

Carbon Reduction Plan (CRP)

Supplier Name: MaN Pharma Limited

Publication Date: 29/01/2026

Commitment Period: 2024–2029

1. Commitment to Achieving Net Zero

MaN Pharma is committed to achieving Net Zero carbon emissions by **2050**, in line with UK Government targets. As a small organisation, we voluntarily adopt best-practice principles aligned with **PPN 06/21** to demonstrate our commitment to environmental sustainability and continual carbon reduction.

Our immediate objective is to achieve a **further 20% reduction in carbon emissions over the next 5 years** from our 2024 baseline.

2. Baseline Emissions Footprint

Baseline Year: 2024

The baseline emissions have been calculated using internally available data and reasonable assumptions, proportionate to the size and complexity of our organisation.

Emission Source	Emissions (tCO ₂ e)
Scope 1 – Business Vehicles (Petrol)	60
Scope 2 – Purchased Electricity	30
Scope 3 – Waste & Business Travel	10
Total Baseline Emissions	100

Note: Figures are representative and used for tender and reporting purposes.

3. Current Emissions Reporting (2025)

Reporting Year: 2025

Emission Source	Emissions (tCO ₂ e)
Scope 1 – Business Vehicles (Petrol & EV)	45
Scope 2 – Purchased Electricity	28

Emission Source	Emissions (tCO ₂ e)
Scope 3 – Waste & Business Travel	7
Total Current Emissions	80

This reflects a **20% reduction** compared to the 2024 baseline, primarily due to increased use of electric vehicles and improved operational efficiency.

4. Emissions Reduction Targets

Target Area	Reduction Commitment
Overall Carbon Emissions	20% reduction by 2029
Delivery Fleet Electrification	>90% EV usage by 2029
Electricity Efficiency	Year-on-year reduction in kWh consumption

5. Carbon Reduction Projects

The following environmental management measures and projects have been implemented or are planned:

Transport and Fleet

- Increased electric vehicle usage from **50% in 2024** to **over 70% in 2025**
- Long-term plan to phase out petrol vehicles
- Route optimisation to reduce mileage and fuel use
- Driver awareness on eco-driving practices

Energy Use – Warehouse and Office

- Efficient use of lighting, air conditioning, and office equipment
- Behavioural controls to ensure equipment is switched off when not in use
- Consideration of energy-efficient equipment in procurement decisions

Waste Management

- Waste managed by an approved waste management company
- Business waste data confirms no generation of harmful environmental waste
- Ongoing monitoring of waste streams

6. Governance and Reporting

Environmental responsibility is overseen by senior management, who: - Review carbon performance annually - Approve carbon reduction objectives and action plans - Ensure resources are available to meet commitments

Carbon data is reviewed internally and updated as part of ongoing business planning and tender submissions.

7. Declaration and Sign-Off

This Carbon Reduction Plan has been completed in accordance with **PPN 06/21** and the associated guidance and reporting standard.

We confirm the accuracy of the information provided and our commitment to continual carbon reduction.
